

# New Vision Australia's Liquid Minerals

- All-natural, not processed
- Made in our own, state-of-the art manufacturing facility

The proper balance of minerals is an important factor in your health and wellness. And the only way to achieve that balance is through your diet. To supplement what may be missing in your diet, New Vision offers Liquid Minerals®, a completely balanced, 100% ionic, all-natural mineral formula that includes 65 major, trace and ultra trace minerals.

New Vision offers its world renowned Liquid Minerals to supplement your diet. Liquid Minerals is distinct in many ways.

The first distinction is form - it's liquid. This liquid form allows the natural minerals to be present in solution as ions. An ion is the smallest component within which a mineral can exist and still retain its physical properties.

The second distinction is that these are natural minerals which have been carefully extracted from naturally occurring plant vegetation. These plants have lain, undisturbed in the soil for thousands of years soaking up the natural minerals. These minerals are then released into the water and surrounding environment. New Vision takes these most basic, natural and unprocessed minerals and purifies them and includes them in this delicious natural supplement.

The third distinction is the inclusion of ultra trace minerals. Liquid Minerals delivers about 65 major, minor and ultra trace minerals. Because of our high intake of processed foods, we no longer take in the required amount of trace elements. Liquid Minerals allows you to replenish your stores, in a way that is easy to take and easy for your body to use.

## Supplement Facts

Serving Size 2 Tbsp (30mL/1 fl oz)  
(Servings Per Container 32)

	Amount Per Serving	% Daily Value
Calories	15	
Total Carbohydrate	3 g	1%*
